

## Warning – Humiliation & Desperation

I produce two types of “warnings”; Immediate Action and general warnings. I almost made this an Immediate Action warning...the most urgent and serious...but I could not attach a specific action to take relating to the warning. Subsequently...this is a “general” warning but urgent and serious.

---

*Note (added this morning – April 8th):* **DO NOT BE DECEIVED BY White House PROPAGANDA**

Trump/US was forced into accepting a cease fire in the Iranian War. Trump was outmaneuvered by the leadership in Iran. Iran had already partially opened the Strait of Hormuz to countries that refused Trump’s desperate call for help to assist the US in its war against Iran. Iran was bludgeoning Israel virtually night and day with drones and missiles inflicting heavy damage and casualties. Iran was so aggressive in their attacks against Israel and US resources in the region the US has run dangerously low on interceptors. US military forces were not able to significantly eliminate Iran’s capability to wage war.

Iran had also forced the US to spend \$150 - \$200 billion dollars in the war. The US actions cost the US economy hundreds of billions of dollars and the world lost trillions of dollars. The US has become essentially isolated in the world...other than Israel. Trump had also suffered huge political losses domestically in real terms and public relations terms. Trump had no choice but to accept a cease fire.

Trump effected regime change...and got a more hard-line leader in his place.  
Trump was not able to secure or eliminate Iran’s small stash of non-weapons grade uranium.  
Trump was not able to open the Strait of Hormuz.  
Trump was not able to seize Iranian oil fields.  
Trump cost US military personnel hundreds of casualties.  
Trump cost the loss of significant military resources.  
Trump showed the world that the US can be rather easily defeated in asymmetrical warfare.  
Trump has driven the world’s respect for the US to an historic low.

In real terms...in actual numbers...in accomplishing stated goals...in terms of losses...Trump has lost the Iranian War. Administration insiders have leaked that Trump is out-of-his-mind furious about the Iranian War, and almost delusional in what it actually means. The White House is in full damage control mode trying desperately to spin the cease fire as an accomplishment...a win...for Trump...when clearly it is not.

---

### **Current US & Global Situation :**

- All the economic numbers show the US economy is in grave shape and getting worse.
- Millions of Americans have demonstrated and protested across the country against Trump.
- The US started a war with Iran which has isolated the US from the rest of the world.
- Global view of the US is abysmal. The US is respected and approved of less than Communist China.
- The war with Iran has caused the world trillions and trillions of dollars in damages.

## Warning – Humiliation & Desperation

- International law experts, foreign and domestic, are clearly stating that the US has committed war crimes in Iran.
- With US help, Israel is expanding its takeover of foreign lands in the middle-east...creating a virtual genocide situation.
- Trump has actually, in his own words, threatened to exterminate the entire population of Iran, wiping out the whole Persian civilization...qualifying as genocide.

### **Background -**

Here is where my main concerns are:

- It is public knowledge that the Democrats are organizing a 25<sup>th</sup> Amendment push to remove Trump from office...and it is gaining popularity in Congress and among US voters as well.
- I was unable to multi-source this, at this point I will call it “rumors”, there are Republican Congressmen, in surprising numbers, that are committing to joining the 25<sup>th</sup> Amendment push.
- There are Congressmen and public figures privately passing on to key military leaders to not obey illegal orders regarding the Iran War.
- Multiple retired generals and military insider whistleblowers are passing on information that there is “reluctance” of military leaders to accept Pentagon orders to attack civilians and civilian infrastructure. Certain commands have turned down some Pentagon target packages due to war crime potential...and *redirected* those orders to actual military targets against Trump Administration demands. There is also “slow-walking” taking place within the military in regards to other orders that are legally questionable.

President Trump and the Republicans will lose the mid-term elections. That loss will bring about Trumps’ impeachment and removal from office. Further, once removed from office it is likely that Trump would face charges via the War Crimes Act of 1996. If not removed from office, Trump could still face war crime charges via the International Criminal Court (ICC).

Trump is facing a huge push back in the US and his approval numbers are plummeting. Even Republicans and some MAGA folks are drifting away from supporting Trump. Many media people who formerly supported Trump are now actively denouncing him and his actions. Most notably is Tucker Carlson...who Trump is now trying to publicly demean and marginalize...unsuccessfully.

So Trump’s position now is global rejection/disapproval, a bad and worsening domestic economy, losing political capital and power, the loss of the Congress in November, a growing effort to remove him from office via the 25<sup>th</sup> Amendment...and most of all...his leadership is being questioned and resisted by a growing number of military leaders. And his complete and total humiliation with his war on Iran...no matter what he has done he can’t beat Iran...and at best it will result in a “draw”.

Evidence of Trump’s mental instability:

- Read his Easter morning post [< click here >](#)
- Read his Monday morning’s post [< click here >](#)
- His address to the nation regarding the Iran War...almost incoherent.

## Warning – Humiliation & Desperation

- He is lashing out at anyone who opposes him in the most vile ways filled with vitriol and hate...and untruths.
- His continual lying about virtually everything, especially the war progress and the US economy.

Yes, you could say the “evidence of mental instability” is more indicative of “desperation”...and I would agree with you. It could be a “chicken vs egg” situation...with both desperation and mental instability being present...one driving the other.

Here’s the problem with *desperation*, it leads to...

- Narrowed thinking or "tunnel vision" with a predominate focus shifting to immediate escape from pain or pressure.
- High emotional intensity with fear, urgency, shame, panic, or loneliness overpowering careful judgment.
- Risk tolerance increases exponentially accepting options that would normally be rejected.
- Short-term reward dominates, creating immediate relief which is seen as more valuable than future adverse consequences.

### **Warning -**

President Trump is growing increasingly desperate...to a point now where that desperation and/or mental instability has become dangerous. Dangerous to the future of Iran to be sure, but also dangerous to the US and the international community in general. Remember, Trump has threatened the use of nuclear weapons against Iran to wipe their entire country off the earth. Along with the desperation and/or mental instability, President Trump’s options are becoming more and more limited. He has very few options left to maintain power, let alone leave a favorable legacy.

At this point in time I have no idea what Trump might do when he hits the breaking point of his desperation or mental instability. He is capable of anything...he has proven that time and time again. To quote some of those who know him, “*He is becoming more and more unhinged.*”

The bad part of this...there is nothing specific you can do to change the outcome...other than pray. Generally speaking, you can refine and upgrade your “preparing” for emergencies, disasters, or even a hard grid-down event. Timing projection is mostly unknown. The upcoming mid-term elections could be a trigger but I have no clear indication or evidence of such.

The single best thing you can do is stay [Situationally Aware](#) of what is happening. On top of that...be prepared to act quickly and decisively to [protect your family from risks & threats](#).

Here in the United States we have reached a critical point. In terms of tension, frustration, chaos, confusion, and contention...the US population is nearing critical mass. When that boils over it could get ugly very quickly. It could bring down the markets, the banking system, and/or bring violence to the

## **Warning – Humiliation & Desperation**

streets the likes of which we haven't seen since the 1960's...and there is potential that it could even be far worse.

Back to prayer...Pray mightily that our military leaders will make the right decisions and choices. Pray that God will touch Trump's heart and turn him away from war, death, destruction, and chaos. Pray that our Congressional leaders will find a path to stabilize the country and make the right decisions for the United States. Pray that no crazies will do anything stupid. Pray for peace and tranquility in the country, no violence. Pray that the Iranian War will end...and not just some cease fire that will be broken. Pray that our military personnel will be protected from the needless casualties they are presently suffering. Pray for those men, women, children, and babies that are being killed in Iran by US and Israeli bombs. Pray that you will know what to do to prepare for you and your family. Pray that God will turn our country away from the evils that currently grip it. Pray...pray...pray...and then pray some more.

Mathew 5: 4 – 11 & 43 - 45
